

ML-20CR

ML-20CR is an individual outdoor panel with the EM-Marin card reader.

The unique design of ML-20CR effectively distinguishes it from other panels.

ML-20CR has a built-in proximity card reader and also can store up to 248 cardholder EM-Marin cards to the protected internal memory.

The uniqueness of this model is in supporting two formats of video signals: CVBS and AHD.

When you connect the panel to the DVR or video intercom with the function of recording by motion, the recording will be performed continuously or by motion detection, according to chosen settings.

Characteristics:
